## Project Description

Development of a web application to manage the requests for the updates of source/binary images/DB structure of HR/Payment/TimeKeeping/Access/Racks apps.

## Measurable Objectives

- Each step can be checked by the authorized person using a web interface.
- IT validation of each execution step will be archived in a SQLDB.

## Expected Major Contributions

- Prevent the flood of email box
- Automatic archive of update requests for audit process

## Expected Benefits to Intern

- Reduce the intervention time for IT servers admin/DBAdmin
- Contribution to system improvement

## Intern Qualifications (schooling, work experience, major)

- Knowledge of SQL required
- Web programming skills required
- Demonstrate ability to work with others in a team environment
