

# Ford Romania Intern Program Internship Workplan

<b>Function Name:</b>	Stock management in warehouses	<b>Supervisor Name:</b>	Costi Circiumaru
<b>Department Name:</b>	IT	<b>Supervisor CDSID:</b>	Ccircium
<b>Assignment Location:</b>	Craiova	<b>Supervisor Position#:</b>	

## Project Description

### Name: Stock management in warehouses

Build an HTML/ASP/SQL Web Application for stock management in warehouses (inputs, outputs, reports);  
 The application will be hosted on a virtual IIS server in Ford;  
 The application should manage inputs and outputs in a web interface;  
 Administrators/Users Management;  
 Authenticated users will have access to a web page where they can make predefined queries regarding the stock;  
 Administration page (define parts, define stock alerts, etc.)

## Measurable Objectives

- Real-time stock queries
- Stock history
- Stock alert

## Expected Major Contributions

- Offers a stock snapshot in each managed warehouse
- Avoid stock 0 for managed stock elements

## Expected Benefits to Intern

- The application can be globalized, it can be exported in other Ford Factories
- The application can be used not only for warehouses but also in departments for small specific stock management

## Intern Qualifications (schooling, work experience, major)

- HTML/ASP programming skills
- Ability to work in Team environment
- SQL
- MS Access
