

Ford Romania Intern Program Internship Workplan

Function Name:	Finance	Supervisor Name:	Daniel Tecu
Department Name:	Internal Control	Supervisor CDSID:	dghita3
Assignment Location:	Craiova	Supervisor Position#:	ICC
Project Description			

Container management.

All the parts used in production processes are handled using Containers special designed according to usage purpose. Durable Containers are items such as bins, racks, frames, pallets, and other durable shipping devices that are expected to be in use more than one year. Those containers are registered in Company's Book as fixed assets being shipped among different production facilities. As the containers are to be shipped continuously supporting logistical process, there are very important for production process. Also, being valuable company assets, controls for tracking and managing Company-owned durable containers and shipping racks should be in place. Internal Control Dpt. as Finance representative participates in the preparation and verification of the physical containers count according Finance Manual.

Measurable Objectives

- Perform an assessment for Container management process in order to identify weak and strong points.
- Develop action plans able to assure the strengthening of the process in terms of Controls and tracking of Company – Owned Containers.
