Dear Cristian,

It is a pleasure for me to express my great appreciation of the Department of Applied Mathematics (DAM) of the University of Craiova.

I have met with several DAM members at international conferences, both in Romania and elsewhere in Europe, which reflects the quality of the research in your department. Actually, I have collaborated in research with DAM professors. These collaborations have resulted in the publication of papers in good-level mathematical journals. These papers focused, in particular, on the modelling of the transmission of contagious diseases, which in the current context is becoming of prime importance to the general population.

In addition, DAM professors have published books that have contributed to its international renown.

Finally, the international congress that you have been organizing very professionally since 2016 has quickly become a way to further increase the notoriety of your department.

Sincerely,

Mario Lefebvre  
Full Professor
